Tanner Alix

Professor Hendricks

Senior Seminar

16th February 2023

Peer Review

Project: https://github.com/CIDS-484-Spring-2023/Senior-Capstone-Project-McCullough

Grading: 9/9

Quality of Work: 3 Points

The idea that he is planning on doing looks really thought out and is very clear. He has the type

of coding that he wants to use (R) and in the video he shows that he has example code made

up just not placed onto Github yet.

Intellectual Merit: 3 Points

I gave you a 3 because this looks like a fun project that you have a good outline for and can

achieve in the timeline giving for the semester.

Video: 3 Points

He shows where he gets his data from along with what the data is. The outline of the project is

very clear and looks like it will be a good project to pursue for this course.
